CERAM-A-STAR® 1050 finishes offer a superior resistance to ultraviolet radiation, resulting in excellent color retention and resistance to chalking. These finishes resist peeling and checking, while withstanding prolonged exposure to the elements.

CERAM-A-STAR® 1050 coatings are silicone-protected finishes that combine excellent physical characteristics with superior aesthetic values. This composition provides a hard, yet flexible finish for long-term weatherability in a variety of climates.

WARRANTY POLICY: The only warranties available are those issued in writing by the manufacturer and no other warranties either implied or expressed are to be considered.
